

U.S. MAGNETIX

OUTSIDE PRESS SHEET SPECIFICATIONS

When providing U.S. Magnetix with pre-printed press sheets, please adhere to the specifications below to help eliminate problems with your order. These are simplified guidelines and are not meant to replace personal attention to each individual project. Please discuss your job with a U.S. Magnetix representative before production so we can best serve your needs.

Guidelines

- Use only cover stock. U.S. Magnetix CANNOT accept text stock.
- Always indicate a consistent guide corner (mark grip & guide edges).
- Crowd live image to .5" from grip & guide edges.
- Do NOT trim sheets after printing.
- With sheet sizes up to 14" x 20", live image area should not exceed 12" x 18".
- With sheet sizes larger than 14" x 20" up to 19" x 25", live image area should not exceed 18" x 24".
- Print must match an existing dieline (provided by U.S. Magnetix) OR match a new dieline approved for production by U.S. Magnetix.

Note: Failure to follow these guidelines may result in added costs to your project.

If you have any questions please don't hesitate to ask BEFORE you print your sheets...
